Innovation Cell:

Innovation Cell (I-Cell) The aim of Innovation Cell at Oriental is to look after the internships, expert guest lectures and industrial visits. The I-Cell encourages conversion of ideas into products and overall development of the student. The I-Cell also works as an Incubation Centre of the institute and aim at the development of India's innovation ecosystem. They encourage them to work in their field of interests and apply their theoretical knowledge in practical world. The whole event is graced with inspirational and motivational words. The institute has active collaboration with Atal Incubation Center

(AIC-AARTECH). The institute also work in coordination B-nest which is a unit of Smart City Development Corporation at Bhopal. The I-Cell coordinates various activities for the budding entrepreneurs. The institute in the year 2018-19 got registered with Ministry of Human Resource Development, Government of India as Institution Innovation Council (IIC) for innovators and entrepreneurs. The institute has nurtured six start-ups of its students.

List of Facilities Available:

Games and Sports Facilities

The Institute was established in the year 2002 with adequate facilities for cultural activities, outdoor and indoor games facilities and gymnasium with yoga facility as per the regulatory body All India Council for Technical Education, (AICTE), a body of Ministry of HRD, Government of India.

- Institute has outdoor sports facilities for games like Badminton ground admeasuring 20 x 44 Sq/ft(81.74 Sq.m.), Basket ball ground admeasuring 28 x 15 Sq.m., Volley ball ground admeasuring 18 x 19 Sq.m, Cricket ground admeasuring 20 x 11 Sq.m and Kabadi ground admeasuring 130 Sq.m.
- The institute has indoor facilities for games like Table- Tennis, Carom, and Chess separately for boys and girls.
- The institute has sports room and store room.
- The players are provided Track suit, T- shirts and lower for practice. There is provision for providing TA/DA to players for participation in State and National events.
- Winners are felicitated with mementos/ cash awards. Institution provides its playground for organizing events of other institutes.

Facilities for Cultural Activities:

The institute organizes various cultural and literary competitions like dance, song (group and solo), extempore writing, debate, face painting, painting Just a Minute (JAM), mehendi, singing solo and group, tattoo making, treasure hunt, fashion show, musical night, nukkad natak, collage making, movie making, etc. every year at the time of celebration of Youth Festival and annual social gatherings. The winners of all these competitions are felicitated in annual function celebration with trophy, certificate, mementos and cash prize. Page 48/116 16-09-2020 05:13:05 Self Study Report of ORIENTAL COLLEGE OF TECHNOLOGY Separate Green room facilities for boys and girls for preparation of cultural events are made available in the auditorium. cultural programs. During the cultural events, faculty members groom and help the students for various cultural competitions. These competitions are organized at the inter departmental and inter collegiate level. The institute every year organizes state and national level technical and cultural fest named as Techfizz. The participants of all these cultural activities are supported by professional choreographers, dress designers and transportation, of which the payments are made by the institute. Those students who are selected to represent college at university level, state and national level competitions are financially supported by the college by providing them TA/ DA as per the norms. Students are motivated to participate and unveil their hidden talents on special occasions like Republic Day, Independence Day, Gandhi Jayanti, Swami Vivekananda Jayanti etc. Refreshments are also provided to students and staffs during National festival celebrations.

Gymnasium

Institute has facilities of two gymnasiums, one exclusively for boys and one exclusively for girls.. All the gyms are spacious and well equipped with modern exerciser facilities. Qualified gym instructors are available to train students specifically for their respective sports and gym exercises.

Extra Curricular Activities

Oriental College of Technology (OCT) has a well established practice to involve students in all its academic and extra academic activities. This enables the students to develop leadership qualities and team work by actively participating in various institute activities. There is no direction given by the Directorate of Technical Education, State Government or the affiliating university R.G.P.V. However, the institute has taken an initiative and form Student Activity Council (SAC) comprising of various nominated members from the student body of all the semesters at various posts. The identified students are recommended/ nominated by the Heads of respective Departments, along with the consent of TG and Director of the Institute. The selection is based on the criteria of Attendance, Achievements, Leadership, Behaviour and sense of Belongness, towards the Institute.

- SAC representatives register their active involvement in functioning of the institute. They help in coordinating all the events related to Academics and other Co-curricular & Extra-curricular activities, as per the directives laid down by the institute. Annual Techno Cultural and sports events are conducted by them under faculty guidance.
- Council does a lot of academic and administrative work by handling Positions of Discipline and Regularity, Training, Placement and Alumni activities. It helps to enhance professional communication amongst students by releasing fortnightly newsletter of the Group, framing press releases etc. through student media and publicity members.
- The SAC (Student Activity Council) has nominated president, general secretary and treasures usually from the senior semester classes. The SAC also has nominated Convener and Co-convener for media, cultural, technical, sports, training, placement, discipline and alumni related activities. The convener and Co-convener along with senior faculties organize concerned activities with full enthusiasm and responsibility right from beginning to reporting, feedback and action taken report.

- Council contributes in communicating the information between students and faculty members. It further guides the fresher students and orients them towards the established norms and culture of the Campus.
- SAC involvement also extends to arranging industrial visits, arranging expert lectures, workshops, seminars, conferences, under the guidance of concerned departments. Support to the internal student network is provided by staff, faculty members along with administrative representatives.
- Besides SAC, student representation is also reflected through events conducted on weekends under various technical and hobby clubs. The IQAC also has representative from the students to ensuring and understanding the concept of quality in all its activities.
- Student representation at formal and informal levels is reflected when institute involves them in planning and policy making procedures through meetings. They are given autonomy to bring creativity in functions and on social media platform to work on public relations area.
- The feedback taken from the students from time to time on regular basis about the functioning and activities of the institute, gives them space to air their opinions. They are actively involved in startups, alumni interaction, and technical clubs. Students' body has quite a major role in each and every significant and mundane activity of the Institute.

Soft Skill Development Facilities:

Soft skills are personality traits and behaviours. Unlike technical or 'hard' skills, soft skills are not about the knowledge you possess but the behaviours you display in different situations. The students attend regular sessions held on soft skills which help in grooming their personalities as they learn about the various skills which are important for them in their present and future as well.

20) Best Practices Adopted by the Institute:

1. Best Practice-I :

Title of Practice: Institutional Social Responsibility (ISR)

Objectives:

- 1) To inculcate social awareness, moral values and environmentally responsible behavior amongst students.
- 2) To nurture students as citizens with moral, ethical and social values so as to provide service to the society through activities and discharge their obligations towards the society.

The context:

Being an educational institution we have certain responsibilities towards the society and environment at a large. They are as under.

- (1) **Protection of Environment:** Pollution is a major problem of present times, which is due to commercial organizations. Air pollution and water pollution are due to the industries, chemical plants, cement plants, etc. An institution should take all possible measures to minimize pollution.
- (2) **Reasonable use of Resources:** An institution should make proper use of available resources in the large interest of the society. The resources like fuel, water, land, etc. must be used economically.
- (3) **Reservation for Weaker Section:** An institution is expected to provide the jobs and employment opportunities for uplifting economically weaker section of the society.
- (4) **Development of Villages and Backward Regions:** The society requires that An institution should start development in villages and backward areas in every aspect. This will uplift the overall rural population.
- (5) **Financial Assistance:** The society expects donations and financial assistance for various social causes, such as eradication of poverty, illiteracy, etc. They expect company to take part in anti-drug campaigns, anti-noise campaigns, and so on.
- (6) **Employment Generation:** An institution generates employment in various fields. Such effort will help to solve problems caused due to unemployment in the society.

The practice:

- Making students aware and encourage them for our responsibility for societal development.
- Arranging training and awareness drives for unprivileged school children, orphanage, old homage, etc.
- Adopted few of the surrounding villages for overall social development of the citizens of villages. Undertaking activities, schemes for village development.
- Developing education projects based on need for unprivileged school students, orphanage, old homage, etc.
- Organizing training and awareness drives in association with social organization, clubs.
- Planning and execute projects for physically challenged persons.
- Arranging seminars and lectures by social workers for faculty and students.

Problems Encountered and Resources Required

The major challenge of executing this practice includes making the intuition to uphold social responsibility activities as well as the institutional academics both sustainable in four ways: ethics, economic, social and environmental. Paying equal amount of attention to all the four dimensions, but many institutions think that social responsibility is a much exterior part of their business, whereas most think it to be an irrelevant issue for

their business as satisfying their students is more important for them. It is further felt that social responsibility is crucial over the knowledge inculcation and skill development among students. Concentrating only on academic aspects makes them blind folded towards other important changes taking place nationwide. The change is named as social responsibility which is an opportunity in itself for the future

2. Best Practice-II

Title of Practice: Employability Enhancement Training Model (EETM)

Objective:

Development of the competent workforce of the country. It is expected that the under graduates and postgraduates who have passed out successfully from the college are competent and fit enough to work independently in a variety of settings.

The context:

In response to this, OCT has introduced an Employability Enhancement Training Model for setting up a high standard of employability enhancement which ensures training of undergraduates and postgraduates who can function independently as engineers, experts, researchers or technical teachers when they complete their course. This model is a progressive step that addresses variability of standards within and across the departments.

The practice:

Entrusted professional activities is an essential professional work, activity or task for future engineers that requires specialized knowledge and skills, and encompasses multiple competencies. Once done, it ensures that the outgoing graduates can be trusted to perform that professional activity at any level.

S. No.	Table showing Steps involved in Employability Enhancement Training Model (EETM)
1	Departments prepare a list of competencies required to be attained by the graduates and set their levels to identify at what level students are achieving them.

2	Competency level are evaluated two times in a semester
3	Appropriate actions are taken if it required and improvement over this practice is found out if any.
4	The students are graded by the faculty after admission and the difference in levels, if any, between self-assessment and faculty assessment, would be shared with the student as feedback. This process enables the student to understand the differences between one's own perspective and that of the trainer.
5	On admission, each student is allotted Tutor Guardian (TG) who will mentor with the student till the completion of the course.
6	The mentor follows and records the progress of the student on regular intervals.
7	The students are encouraged to discuss aspects of their training, the difficulties perceived in the course and other relevant issues with the mentor.
8	The mentor responds to the queries and records his/her observations in his/her weekly post.
9	For students not showing 'Satisfactory' progress, intervention in the form of a focused feedback and additional exposure to learning resources and skill training is instituted.
10	In addition to the TG, other HoD can also monitor the progress of the student & provide constructive feedback.

Common Skill Required by Engineers

S.No.	Competencies	Target Span
1	Effective technical skills	2nd, 3rd and 4th Year
2	The ability to work under pressure	3rd and 4th Year
3	Problem-solving skills	1st , 2nd and 3rd Year
4	Interpersonal skills	3rd and 4th Year
5	Verbal and written communication skills	1st & 2nd Year
6	Team working skills	3rd and 4th Year
7	Creativity	1st , 2nd and 3rd Year

3	ME	CATIA, Ansys, CNC Programming, Auto CAD, SolidWorks and 3-D Printing
4	CE	Project Management, Advance Materials, 3D Printing and Robotic

Evidence of success:

The main highlight of model is preparation of a list of EPAs. Since competencies are not directly measurable they are stated in terms of EPAs and their levels. Each EPA is mapped to respective and appropriate domains of competency and level of competency at the end of 1st to 8th semester of undergraduate course and at the end of 1st to 8th semester of Postgraduate course. Outcome of this process is we have successfully made our students competent and ready for the industry. Our placed students themselves show the evidence how effective we have executed this practice. 300 students out of 670 students are placed in reputed companies in year 2022-23
